In the Abstract

Amend the Abstract on page 87, lines 5 – 24 as follows:

-- A portfolio-tracking module having a displayable summary interface is provided within a software suite for enabling viewing and manipulation of multiple categories of aggregated data compiled from a plurality of data sources and accessible through a single interfacing node operated on a data- packet-network.[[.]] The portfolio-tracking module comprises, an interactive main interface accessible through the summary interface, the main interface [[for]] listing stocks and investment accounts for viewing, an interactive menu provided within the main interface for selecting views of individual investment accounts, the views appearing within the same or within a secondary interface, an interactive selection interface provided within the main interface for selecting investment accounts for data tracking, a first interactive hyperlink embedded within the main interface for linking the main interface to a secondary interface for viewing tracked information about personal investments and a second interactive hyperlink embedded within the main interface for linking the main interface to a secondary configuration interface for adding new investment accounts or stocks for tracking. A user working from within the module may interact with selected ones of interactive links for the purpose of invoking a variety of secondary interfaces containing more detailed information about registered investments, financial accounts, and performance data about stocks. --
